- basic rate:	**50,00 €**	**59,50 €**
- basic rate with SSCC:	**75,00 €**	**89,25 €**
Monthly fee for WebEDI (more than 3 trading partners):	(excl. VAT)	(incl. VAT)
- basic rate:	**75,00 €**	**89,25 €**
- basic rate with SSCC:	**100,00 €**	**119,00 €**

The use of WebEDI is independent from number of messages.

There is no initial fee for cctop WebEDI.

If there are any questions left please feel free to contact us: +49 2332 66600-0

A partner/message relation is a defined data flow between two parties into one direction, related to a defined document (e.g. the partner sends orders to the customer. If the partner also sends sales reports to the customer, this is a second partners/message relation). Each partner is identified by an ID (usually GLN) which is hidden in the envelope of the transmission file (UNB segment for EDIFACT; record type 000 in the standard interface).

There is a special regulation for Electronic Data Interchange over a central regulator. Basis for a partner/message relation is here the invoice recipient (central office/line of distribution). E.g. if invoices for three trading partners will be transmitted to one central regulator three partner message relations will be charged monthly.

The lump sum for a partner/message-relation is independent of the number of transactions.

The prices shown above for the partner/message-relations are valid for all standard message types as ORDERS, DESADV and INVOIC. The prices for other message types as PRICAT, INVRPT, SLSRPT are dependent of the amount of data. Here you get an individual offer.

The nonrecurring installation fee includes the creation of the conversion table and up to 3 checks of test files with a protocol. Any additional check of test files in responsibility of the sender will be charged with € 100,- (€ 119,- incl. VAT).

An additional daily CSV logging file via email of all transmitted EDI data on message basis will be charged with € 15,00 (€ 17,85 incl. VAT) monthly.

In case of simultaneous use of clearing and WebEDI (hybrid operation), the monthly basic fee is € 85.00 (€ 101.15 incl. VAT). The calculation of the partner/message relationships takes place according to the clearing price model.

Other services will be charged as follows:

- Reset of a WebEDI message   € 15,00 (€ 17,85 incl. VAT)
- Search request for transmitted files   € 25,00 (€ 29,75 incl. VAT)
- Manual conversion of productive data   € 50,00 (€ 59,50 incl. VAT)
- Error analysis of productive data   € 50,00 (€ 59,50 incl. VAT)
- Change of conversion at partner request   € 100,00 (€ 119,00 incl. VAT)
  (e.g. change of release)
- Change of conversion at customer request   € 150,00 (€ 178,50 incl. VAT)

Additional services will be invoiced at cost, based on intervals of 15 minutes each. The hourly rate is € 100,00 (€ 119,00 incl. VAT).

X.400 communication: a monthly data transfer of 4 MByte in between the BusinessMail X.400 system (Telebox) is included in the monthly fee. Any additional MB of data will be charged according to the price list T-COM BusinessMail X.400.

Exception: the data sender will be charged for X400 transmissions from Telebox400 into other networks (e.g. IBM Information Exchange) according to the price list T-COM BusinessMail X.400.

Condition for the participation in the cctop service is the sign-up by the user. The user flatrate has to be payed for every registered user.

Our general terms and conditions are valid.

EDI-outsourcing from existing systems for individual offer only.
