

DOES YOUR BUSINESS NEED WebEDI?

Then you need a browser – and stratEDI.

Big trade partners want to automate business processes. Small and medium-sized companies don't want to invest in complex software systems. The solution: WebEDI.

It makes it easy to meet the standards of modern digital data interchange. For as little as € 50 / month you're ready to go!

Simple and effective: Data interchange via WebEDI.

GS1 Germany has laid out precise specifications for the structure and dependencies of various documents. Our solution makes it possible to exchange data standardized to these specifications. Automated data transfers reduce manual handling and follow-up to a minimum.

What it does: The functions provided by our solution.

With WebEDI you can receive orders (ORDERS), send despatch advice (DESADV) with SSCC, generate and print GS1-128 labels, and send invoices (INVOIC). All documents can be stored, printed and downloaded as PDFs. If desired, order confirmations (ORDRSP) can be sent. Order filling through dropshipping is also covered.

Experienced and knowledgeable: stratEDI.

stratEDI specializes in supplier integration and partner linkage by EDI (Electronic Data Interchange). Founded in 1994, today the company employs 15 people. We have been working in data clearing with cloud structures since the beginning of the technology.

How it works: Test, register, get started.

At www.cctop.de you can log in to our demo version (user name **stratedi**, password **eancom**). For a monthly fee starting at just € 50 you can use all of the functions shown here with your trading partners. Do you have questions? Contact us directly at +49 2332 66600-0 or webedi@stratedi.de.
